
monitoring, incidents, or material changes reopen preparation
Human and institutional authority
1
Authorize
objective, ethics
4
Confirm
named user
7
Approve
…….. roles
8
Deploy runtime
named engineer
12
Validate
and release
signed human decision
2
Record
the objective
3
Structure and verify
requirements, config
5
Bind
approval
6
Issue startup kit
no credentials
10
Record events
status only
11
Register release
hash-bound
Planning assistant
elicits against R01–R29 and drafts
proposes, never decides
no assistant presence
beyond preparation
Fedlify platform
(self-hosted)
deterministic forms, approval gates, role-scoped access, versioned artifacts, audit ledger
governance metadata and run status only. No patient data, no training update
Patient data stays inside each institution
9
Raining loop runtime
FL rounds
Patient Data
…..
Credential
…..
9a
Distribute
the global model
9b
Train locally
data never leaves the site
9c
Return updates
model weights only
9d
Aggregate
version and log
repeat approved rounds
